

SUPPORTS RESPONSIBLE TOURISM

THE VESSEL

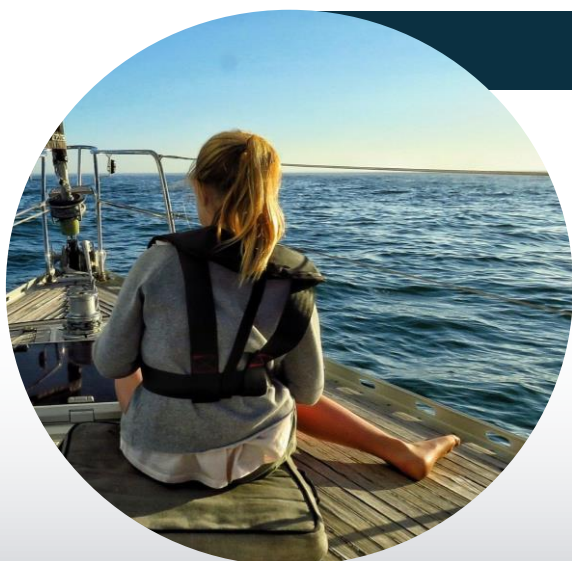

The Outeniqua, a 50-foot sloop yacht, is designed and operated with a focus on environmental sustainability. The vessel's design and equipment, including a 21-meter mast and 4-meter beam, support a sailing-intensive approach that minimizes engine use. This approach reduces our carbon footprint and impact on the marine ecosystem, aligning with our commitment to responsible and sustainable practices.

OUR CREW

Our crew members are recruited from the local community, many of whom have been inspired by the ocean through their involvement in the Knysna Sea Cadets program. We invest in their growth and development, providing training and upskilling opportunities that enable them to become qualified skippers. By nurturing local talent, we deliver exceptional experiences and foster a deeper appreciation for the marine environment.

THE EXPERIENCE

Our charters are set against the stunning natural beauty of our coastline and estuary, providing a unique and unforgettable experience. Our crew share fascinating insights into the scenery, nature, and marine life, educating passengers on the region's rich biodiversity and ecosystems. While onboard, our crew also provide delicious meals made fresh in-house using locally sourced produce. Our bar offers a selection of locally crafted beers, gin, and South African wines.

"I CAN'T CHANGE THE DIRECTION OF THE WIND....

BUT...

I CAN ADJUST MY SAILS TO ALWAYS REACH MY DESTINATION"

- JIMMY DEAN
