

ROMNEY PARK

LUXURY APARTMENTS

ROMNEY PARK BY THE STAY COLLECTION

ENVIRONMENTAL INITIATIVES

We continually look for practical ways to reduce waste, conserve resources and make more responsible purchasing choices.

Here are some of the environmental practices currently in place at Romney Park:

WASTE MANAGEMENT: Recycling bins and collection arrangements are in place for glass and plastic. We have replaced single-use plastic amenities with refillable bathroom amenities where applicable. Other amenities are supplied in recyclable box packaging where suitable recycling facilities are available.

REUSE & DONATIONS: Partially used toiletries, as well as old linen and towels, are donated to Haven Night Shelter where they can be put to further use.

ENERGY USE: LED lighting is used throughout the property, and motion-sensor lighting is installed in the parking garages where practical.

WATER USE: Guests are invited to reuse towels to help reduce the frequency of laundering. Pool covers are used to reduce water evaporation from the swimming pools. Rainwater collected in storage tanks is used to water the gardens.

LOCAL SOURCING: Where available, we purchase South African products, including food and amenities.

SEASONAL PRODUCE: We use seasonal fruit and vegetables where available. Our produce is not air-freighted.
